

**Assignment**  
**(on FreeSQL and OneCompiler online platforms)**

**COURSE CODE:** 05MC0108

**COURSE NAME:** Database Management Systems (DBMS)

| Sr. No. | Questions                                                                                                                                                                                                                                                                          | CO  | Bloom's Level |
|---------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|---------------|
| 1       | Write a PL/SQL block to accept an employee's Basic Salary and calculate: <ul style="list-style-type: none"> <li>HRA = 20%</li> <li>DA = 45%</li> <li>TA = 8%</li> <li>PF = 12%</li> <li>Net Salary</li> </ul> Display all salary components.                                       | CO1 | L3 – Apply    |
| 2       | Create a STUDENT table and write a PL/SQL block that accepts Roll Number and: <ul style="list-style-type: none"> <li>Calculates Total</li> <li>Percentage</li> <li>Assigns Grade</li> <li>Displays Pass/Fail status (Pass if all subjects <math>\geq 35</math>).</li> </ul>        | CO1 | L3 – Apply    |
| 3       | Write a PL/SQL program to generate the multiplication table of a user-entered number using: <ul style="list-style-type: none"> <li>FOR LOOP</li> <li>WHILE LOOP</li> </ul>                                                                                                         | CO1 | L3 – Apply    |
| 4       | Write a PL/SQL block to accept an employee ID and: <ul style="list-style-type: none"> <li>Retrieve employee details</li> <li>Calculate yearly salary</li> <li>Display whether employee belongs to High Income (<math>&gt; ₹600000/\text{year}</math>) or Normal Income.</li> </ul> | CO1 | L3 – Apply    |
| 5       | Write a PL/SQL block that accepts three numbers and displays: <ul style="list-style-type: none"> <li>Largest number</li> <li>Smallest number</li> <li>Average</li> <li>Check also whether all numbers are equal.</li> </ul>                                                        | CO1 | L3 – Apply    |
